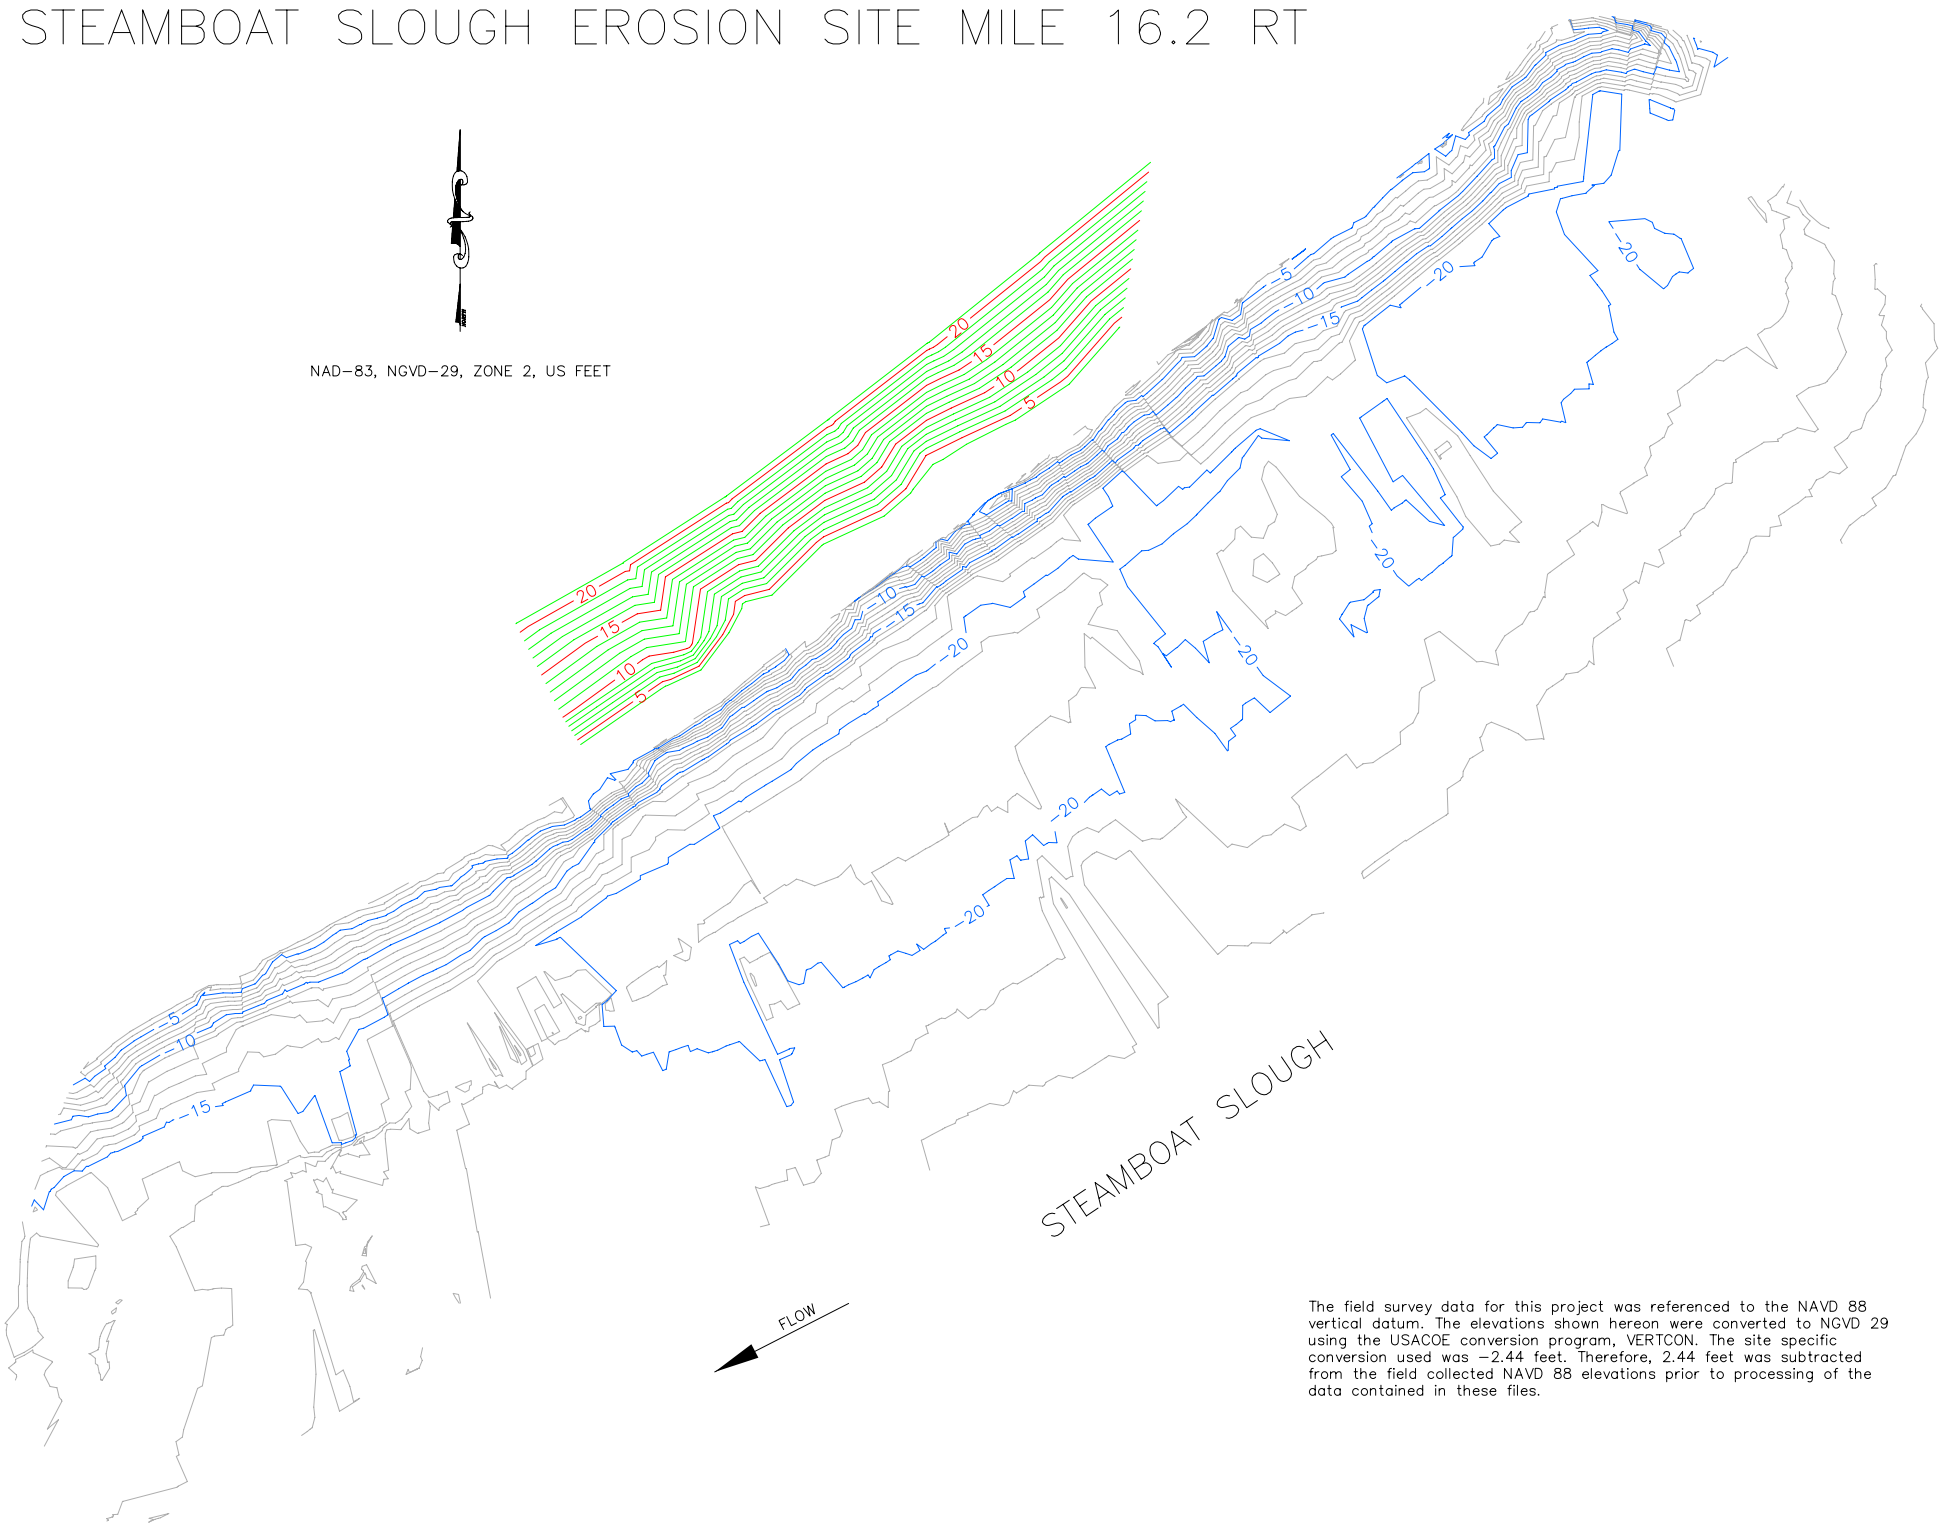
STEAMBOAT SLOUGH EROSION SITE MILE 16.2 RT



The field survey data for this project was referenced to the NAVD 88 vertical datum. The elevations shown hereon were converted to NGVD 29 using the USACOE conversion program, VERTCON. The site specific conversion used was −2.44 feet. Therefore, 2.44 feet was subtracted from the field collected NAVD 88 elevations prior to processing of the data contained in these files.
